Lesson 1: Counting from 1 to 20
- Introduction to numbers 1 through 20
- Interactive counting exercises with visuals and examples
- Practice counting using objects, fingers, and number charts
- Engaging counting songs and rhymes

Lesson 2: Introduction to Basic Addition
- Understanding the concept of addition
- Exploring the concept of combining two groups
- Interactive addition exercises using everyday objects
- Introduction to the "+" symbol

Lesson 3: Introduction to Basic Subtraction
- Understanding the concept of subtraction
- Exploring the concept of taking away from a group
- Interactive subtraction exercises using everyday objects
- Introduction to the "-" symbol

Lesson 4: Understanding Number Patterns
- Introduction to simple number patterns (e.g., counting by twos, fives, and tens)
- Identifying and extending number sequences
- Hands-on activities to recognize and create patterns
- Interactive games to reinforce understanding of number patterns

Lesson 5: Review and Practice
- Recap of counting from 1 to 20
- Practice sessions for basic addition and subtraction
- Reinforcement of understanding number patterns through various activities
- Interactive quizzes to assess and reinforce learning

Lesson 6: Real-World Applications
- Applying counting, addition, and subtraction skills to real-world scenarios
- Problem-solving activities that involve everyday situations
- Encouraging critical thinking and application of numerical concepts

Lesson 7: Numerical Exploration Showcase
- Student showcase where they present their favorite counting, addition, or subtraction activities
- Celebrating achievements and progress
- Providing constructive feedback and encouragement

Lesson 8: Fun with Numbers
- Interactive games and activities to reinforce numerical concepts
- Group activities for collaborative learning
- Introduction to fun math puzzles and challenges

Lesson 9: Interactive Math Songs
- Incorporating music and rhythm to enhance numerical learning

- Sing-along sessions with math-themed songs
- Connecting mathematical concepts with memorable tunes

Lesson 10: Numerical Explorations Certificate Ceremony
- Recognition of student achievements in numerical explorations
- Certificate of completion ceremony for Module 3
- Closing remarks and encouragement for further numerical adventures
